Listing of the Claims

Please amend Claims 1, 9 and 23, as follows:

1. **(Currently Amended)** A method in a computer system for generating a display page, the method comprising:

receiving a request to generate a display page, wherein

the display page comprises realtime information and non-realtime information,

realtime information comprises information capable of being retrieved or generated without significant delay, and

non-realtime information comprises information for which retrieval or generation will result in significant delay;

retrieving the realtime information to be included on the requested display page;

if a previously cached version of the non-realtime information is available,

generating the requested display page comprising the retrieved realtime information and the previously cached non-realtime information; and

if a previously cached version of the non-realtime information is not available,

generating the requested display page comprising the retrieved realtime information and an indication that the non-realtime information is not yet ready for display, **wherein the indication that the non-realtime information is not yet ready for display is provided in the location in which the non-realtime information is to be displayed,**

requesting generation of the non-realtime information,

caching the generated non-realtime information, and

generating the requested display page comprising the retrieved realtime information and the cached non-realtime information in response to a subsequent request for the requested display page.

2.   (Previously Presented) The method of claim 1 wherein said generating the requested display page comprising an indication that the non-realtime information is not yet ready for display further comprises:

including a link for requesting the display page.

3.   (Previously Presented) The method of claim 1 wherein the request to generate the display page is received from a user.

4.   (Previously Presented) The method of claim 1 wherein the request to generate the display page is received when a user logs on to one of the computer system and a client coupled to the computer system.

5.   (Original) The method of claim 4 wherein the display page is a homepage.

6-7.   (Canceled)

8.   (Original) The method of claim 1 wherein the generated information includes a graphical representation of information.

9.   **(Currently Amended)** A computer system for generating a display page of business information, comprising:

a component configured to retrieve realtime business information to be included on the display page;

a component configured to request performance of a computation to generate non-realtime business information to be included on the display page and to cache the generated non-realtime business information;

a component configured to,

if a cached version of the non-realtime business information is available, generate the display page comprising the realtime business information and the cached non-realtime business information, and

if a cached version of the non-realtime business information is not available,

- 3 -

generate the requested display page comprising the retrieved

realtime information and an indication that the non-realtime

information is not yet ready for display, **wherein the**

indication that the non-realtime information is not yet

ready for display is provided in the location in which

the non-realtime information is to be displayed,

request generation of the non-realtime information,

cache the generated non-realtime information, and

generate the requested display page comprising the retrieved

realtime information and the cached non-realtime

information in response to a subsequent request for the

requested display page; and

a component configured to send to a user computer system the display page for

display to a user so that the user can view the realtime information if the

non-realtime business information is not yet ready.

10. (Previously Presented) The computer system of claim 9 wherein the component configured to generating the requested display page comprising an indication that the non-realtime information is not yet ready for display is further configured to include a link for requesting the display page.

11. (Previously Presented) The computer system of claim 9 wherein a request to generate the display page is received from a user.

12. (Previously Presented) The computer system of claim 9 wherein a request to generate the display page is received when a user logs on to one of the computer system and a client coupled to the computer system.

13. (Original) The computer system of claim 12 wherein the display page is a homepage.

14-15. (Canceled)

16.   (Original) The computer system of claim 9 wherein the generated business information includes a graphical representation of the business information.

17-21. (Canceled)

22.   (Previously Presented) The method of Claim 1 further comprising:
if a previously cached version of the non-realtime information is available,

requesting re-generation of the non-realtime information subsequent to said generating the requested display page comprising the previously cached non-realtime information,

caching the re-generated non-realtime information, and

generating the requested display page comprising the retrieved realtime information and the cached re-generated non-realtime information in response to a subsequent request for the requested display page.

23.   (Currently Amended) A computer-readable storage medium comprising program instructions executable to:
receive a request to generate a display page, wherein

the display page comprises realtime information and non-realtime information,

realtime information comprises information capable of being retrieved or generated without significant delay, and

non-realtime information comprises information for which retrieval or generation will result in significant delay;

retrieve the realtime information to be included on the requested display page;

if a previously cached version of the non-realtime information is available,

generate the requested display page comprising the retrieved realtime information and the previously cached non-realtime information; and

if a previously cached version of the non-realtime information is not available,

generate the requested display page comprising the retrieved realtime information and an indication that the non-realtime information is not yet ready for display, **wherein the indication that the non-realtime information is not yet ready for display is provided in**

- 5 -

the location in which the non-realtime information is to be displayed,

request generation of the non-realtime information,

cache the generated non-realtime information, and

generate the requested display page comprising the retrieved realtime

information and the cached non-realtime information in response

to a subsequent request for the requested display page.
